

BIOACOUSTIC SOLUTIONS

Breaking the Sound Barriers of Disease!

Can Your Voice Reveal the State of Your Health?

Evaluating your own voice takes on new meaning if you begin to consider the possibility that the sounds of your voice may be a holographic representation of all that you are. Imagine a future in which our individual vocal frequency is our identification; where the use of frequency based biomarkers contained within our voice can be used to keep us healthy and emotionally balanced.

From birth to death, we use sounds to express our needs and emotions but there are additional layers of information hidden within our words. As man evolved, language became levels of intricate harmony nestled within structures of great elegance that carried meaning and allowed understanding of ourselves and others.

Every Body has a Sound

BioAcoustic Biology has verified that the frequencies of your voice are a numeric holographic representation of those brain waves. Correlations of these frequencies to human health and wellness have been decoded by the Institute of BioAcoustic Biology & Sound Health since the early 80s.

Exploring the Potential of Math as Medicine

In order to provide predictability and safety, the concepts of math and medicine often act conjointly to quantify, define and model medical practice. Studies conducted by the non-profit Institute of BioAcoustic Biology & Sound Health, located in Albany, Ohio, USA, have consistently demonstrated that math can be much more than a measurement tool. The case studies they have amassed, using Math, as frequency-based BioMarkers, indicate that the solution to therapeutic predictability and resolution may be possible.
