Voice samples provide
bio-acoustic information

The SoundHealthPortal.COM was created for the public as a BioAcoustic Vocal Profiling WorkStation to support the concepts of SELF-HEALTH through Vocal Analysis.

Includes self-paced tutorials

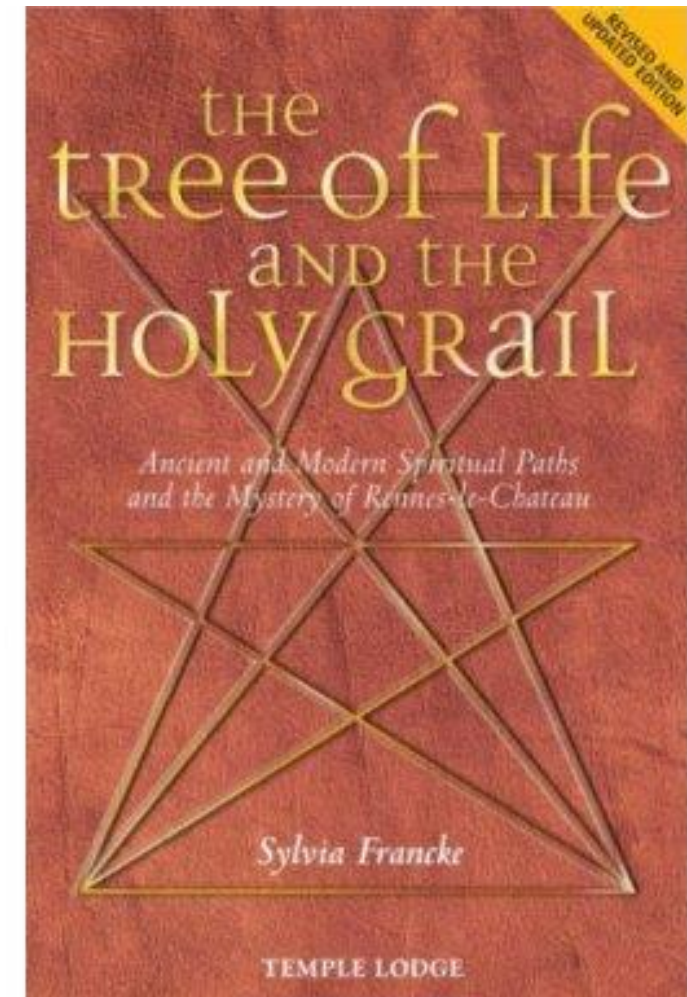

People with similar trauma, illnesses, syndromes, psychologies, diseases, toxins... have similar, if not identical, vocal anomalies.

A Foolish Faith in
Authority is the worst
enemy of **TRUTH**

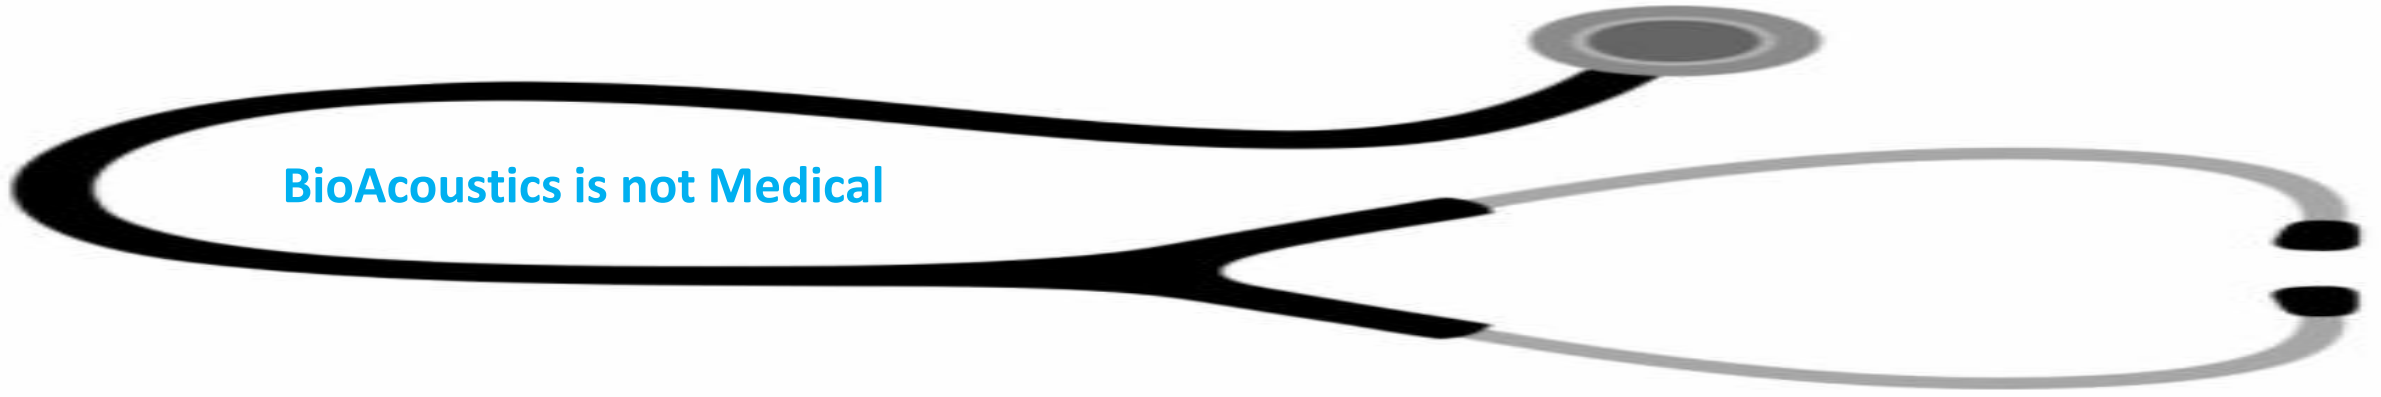

...Albert Einstein

The SoundHealthPortal is the culmination of 30+ years of collecting and comparing Vocalized Frequencies of a human voice as a holographic representation of the body's optimal form & function.

- Sharry Edwards, MEd has been named a “modern keeper of the Holy Grail information” by *The Tree of Life and Holy Grail* author Sylvia Franke.
- Her work has been the subject of twelve documentaries and has been included in over 20 books.
- Sharry Edwards is the recognized pioneer of Human BioAcoustics, BioAcoustic Vocal Profiling and BioAcoustic Biology.
- BioAcoustics is translated as “life sounds” and is a field of research involving the use of Vocal Profiling and low frequency sound presentation to move the body towards “self health.”
- Vocal Profiling evaluates the patterns of the voice in mathematical terms. These numeric values are then entered into a database from which health issues can be assessed.

BioAcoustics is not Medical

The Mathematical principles of Vocal Profiling data collection has been computerized and serves as the backbone of allowing the techniques of BioAcoustic Vocal Profiling templates to be used at the touch of button.

**Using math to connect the dots that
our ancient ancestors knew but
modern medicine has deserted as
legitimate.**

Math as Medicine

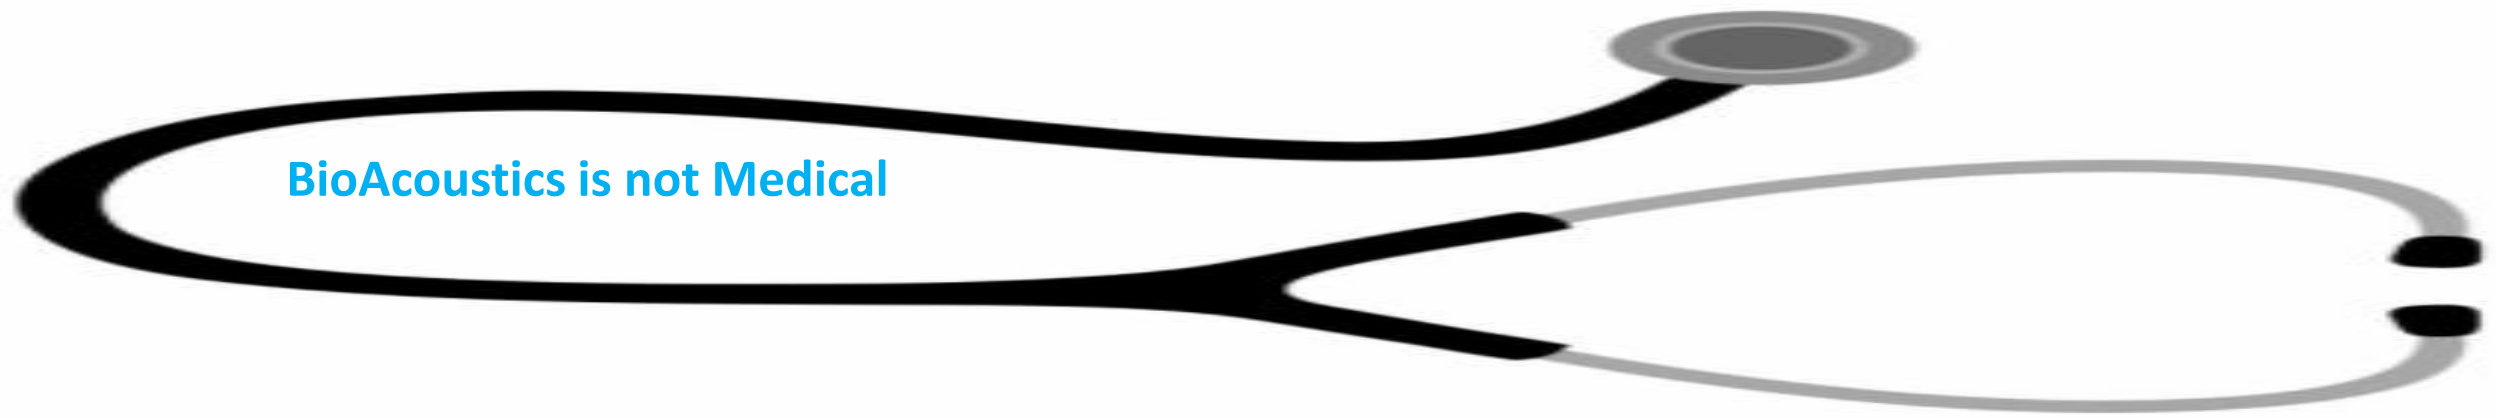

Our Ancient Ancestors used sound to Heal

After procuring a vocal print from your client, at the Guest Level, you can create and email reports.

This report is an 8-page nutritional report which includes stem cell nutrients with ranking.

Session Name: Nutrients/Supplements 9/11 Tools and Solutions™ Eval
ts, Nutrition
Provider™, Stem
Cell Nutrients

Attached is your BioAcoustic Preliminary Report which should be considered by you and your wellness provider in making current decisions about your wellbeing.

LOW usually indicates that a muscle is weak or that a nutrient or biochemical is not as abundant as expected. Options might include a planned exercise program or the inclusion of the LOW indicating nutrient. If a Receptor, Gene, Activator, Protein is indicated, it is often that those indicators are not available under conventional medical auspices. Seek a local BioAcoustic Provider may be an option.

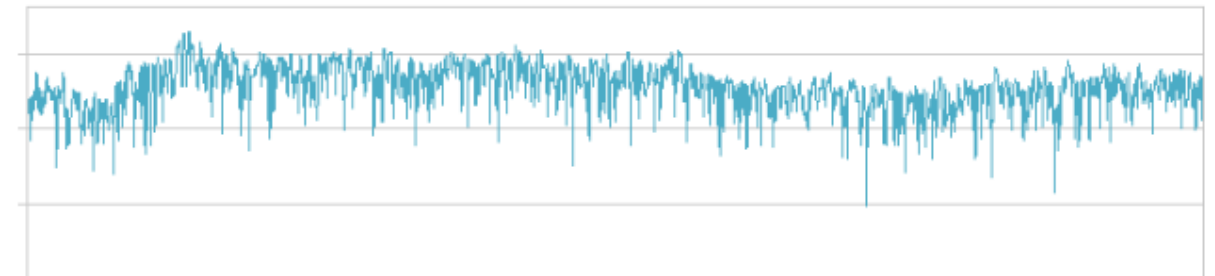

High usually indicates an overabundance of something or a tight or inflamed muscle. Your wellness provider can discuss options with you or ask for further guidance from someone BioAcoustically trained. Use some common sense, if a toxin is LOW; leave it alone; but know that virus/bacteria that show low usually need attention. Results are sorted by Relevance.

If an anti-aging gene shows HIGH, you may think that it needs no attention but many times BioAcoustic research has found that HIGH issues of this sort are HIGH because they are inactive. BioAcoustic Tone Trials will confirm the issue.

Further interpretation should be done by your wellness team and/or a BioAcoustic Provider. You may click on the underlined blue items to open an internet link to that item. Remember that BioAcoustically Speaking one frequency can represent many things.

A [Map of BioAcoustic Providers](#) is located on our web site – [SoundHealthOptions.com](#) – CLINICAL SERVICES tab or call the home office in Ohio, USA 740-698-9119 – M-F 10am-4pm or leave a message any time.

Research Results

| | | | | Rank |
|-------------------------------------|---------|---|--|------|
| bovine casein | Food | H | from bovine milk - contributes to inflammation | 1 |
| Adenylate Cyclase 2 | Protein | H | toxic to cell environment | 2 |

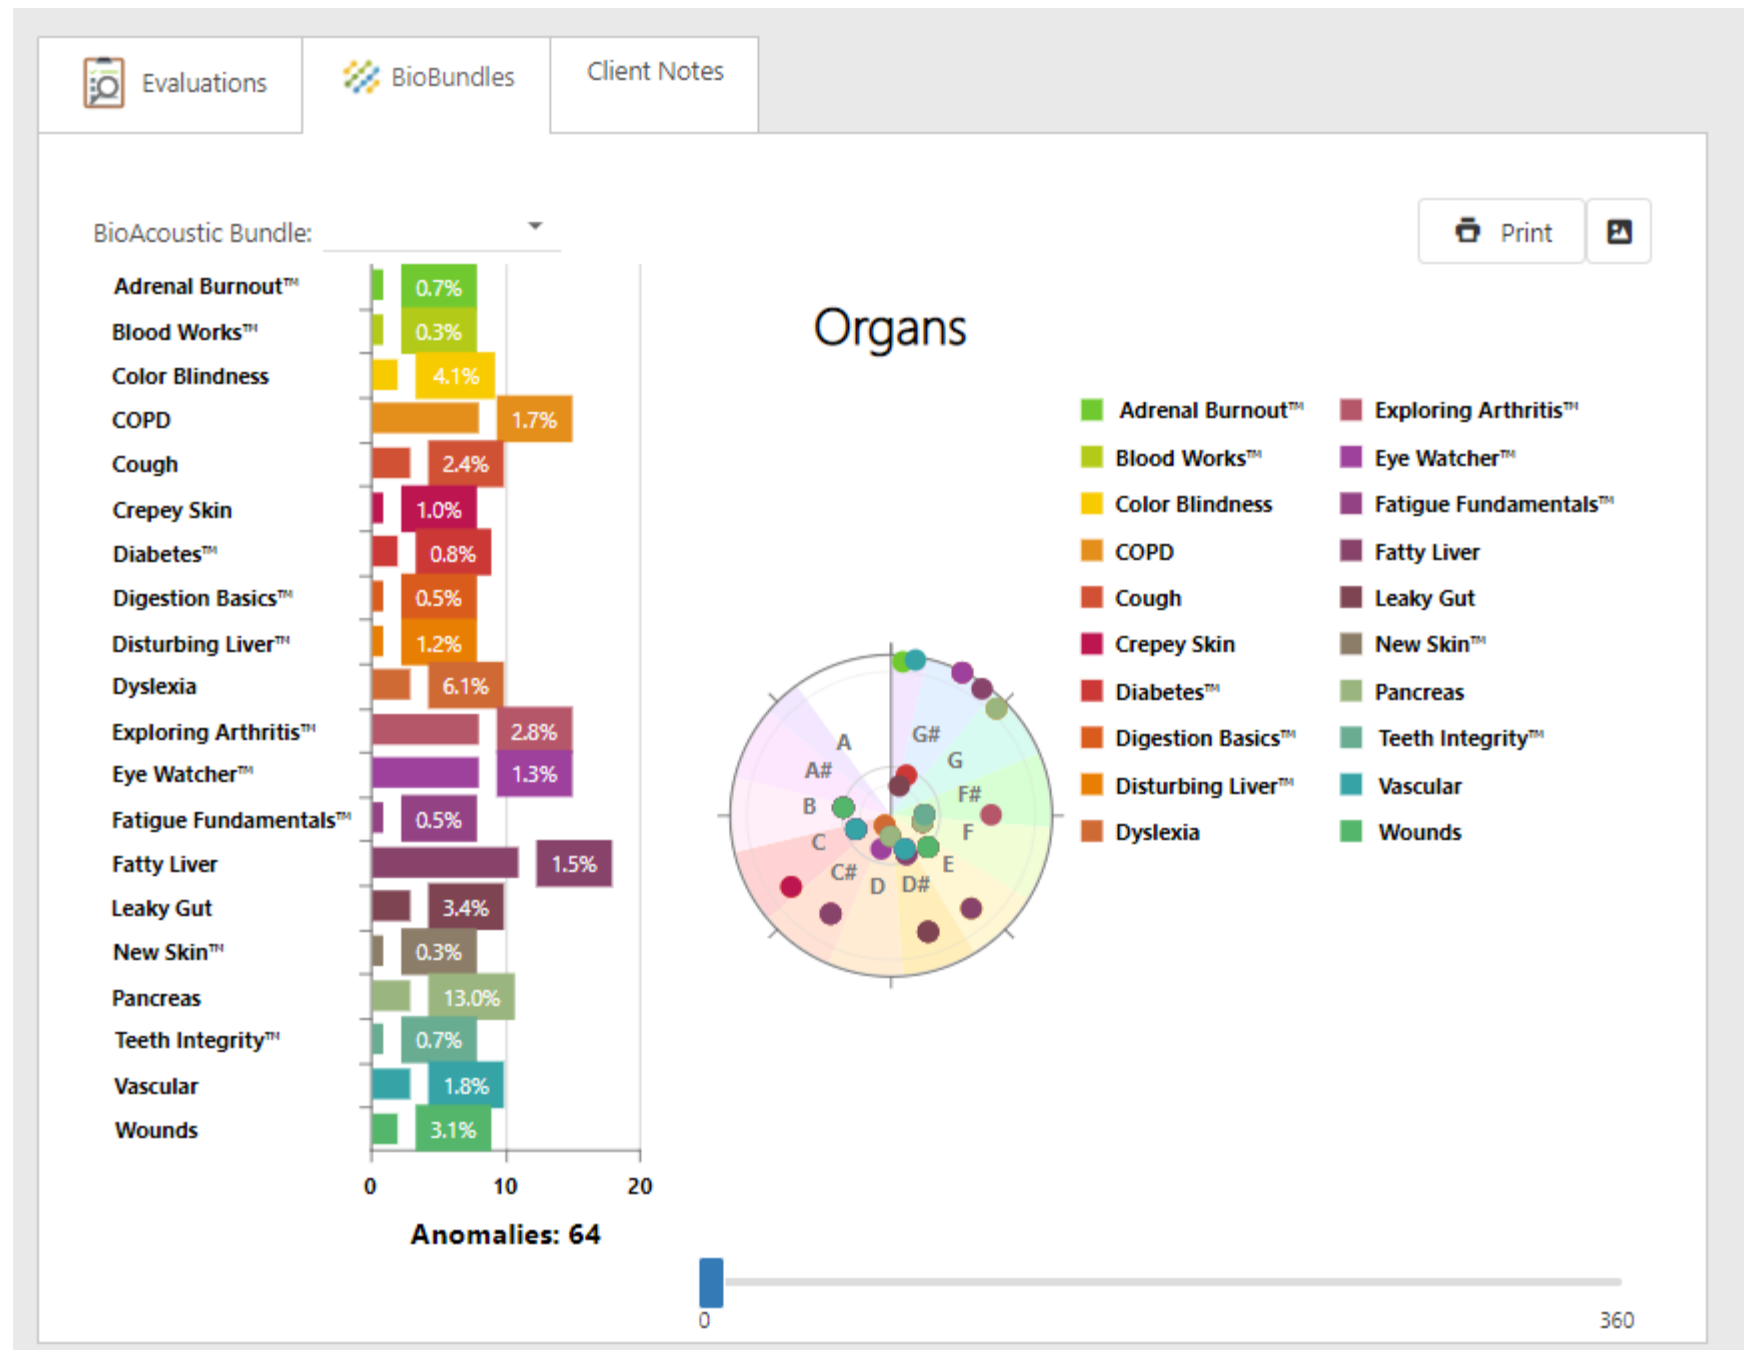

Reports include High or Low of a nutrient, plus importance.

| | | | | Rank |
|-------------------------------------|---------|---|---|------|
| Bismuth | Mineral | H | if high, may cause foul breath, metallic taste, and gingivitis | 2 |
| Bismuth | Mineral | H | In subsalicylate form is used to treat diarrhea, heartburn, & upset stomach | 2 |
| Chromium Picolinate | Mineral | H | A form of Chromium used for supplementation | 2 |
| Chromium Picolinate | Mineral | H | biologically active chromium | 2 |
| Niacin (Vitamin B3) | Vitamin | L | AKA - Vitamin B3 | 2 |
| Niacin (Vitamin B3) | Vitamin | L | blood sugar, low - deficiency may cause | 2 |
| Niacin (Vitamin B3) | Vitamin | L | cholesterol - lowers | 2 |
| Niacin (Vitamin B3) | Vitamin | L | circulation - improves | 2 |
| Niacin (Vitamin B3) | Vitamin | L | depression - deficiency may cause | 2 |
| Niacin (Vitamin B3) | Vitamin | L | diarrhea - deficiency causes | 2 |
| Niacin (Vitamin B3) | Vitamin | L | digestive system - helps in production of Hydrochloric Acid | 2 |
| Niacin (Vitamin B3) | Vitamin | L | Enhances synthesis of many endogenous proteins, aka nicotinic acid | 2 |
| Niacin (Vitamin B3) | Vitamin | L | fat, carbohydrates, proteins, metabolism - aids in | 2 |
| Niacin (Vitamin B3) | Vitamin | L | fatigue - deficiency causes | 2 |
| Niacin (Vitamin B3) | Vitamin | L | involved in secretion of bile and stomach fluids | 2 |
| Niacin (Vitamin B3) | Vitamin | L | memory enhancer | 2 |
| Niacin (Vitamin B3) | Vitamin | L | nervous system - aids in the functioning of | 2 |
| Niacin (Vitamin B3) | Vitamin | L | Pellagra - deficiency can cause | 2 |
| Niacin (Vitamin B3) | Vitamin | L | Schizophrenia - helpful for | 2 |
| Niacin (Vitamin B3) | Vitamin | L | sex hormones - involved in the synthesis of | 2 |
| Niacin (Vitamin B3) | Vitamin | L | skin - needed for healthy | 2 |
| Niacin (Vitamin B3) | Vitamin | L | skin eruptions - deficiency causes | 2 |
| Niacin (Vitamin B3) | Vitamin | L | Vitamin B3 coenzyme | 2 |
| Nicotinic Acid | Vitamin | L | Associated with NAD synthesis; helps control asthma | 2 |
| Nicotinic Acid | Vitamin | L | Vitamin B3 coenzyme | 2 |
| Vitamin B3 | Vitamin | L | AKA - Niacin | 2 |
| Vitamin B3 | Vitamin | L | brain - vital for its normal function | 2 |
| Vitamin B3 | Vitamin | L | cholesterol - lowers | 2 |
| Vitamin B3 | Vitamin | L | circulation - needed for proper | 2 |
| Vitamin B3 | Vitamin | L | diabetes - do not take with | 2 |
| Vitamin B3 | Vitamin | L | digestive system - helps in production of Hydrochloric Acid | 2 |
| Vitamin B3 | Vitamin | L | energy - needed for | 2 |

The image shows a software interface for research. A 'Research' dialog box is open, displaying search results for 'phospholipase'. The search bar contains 'Glycine receptor alpha 1 subunit' and 'phospholipase'. The results list includes 'Lipoprotein-Associated Phospholipase A2', 'Phospholipase A2', 'Phospholipase C', and 'Phospholipases'. A legend on the right identifies three categories: Hemicellulase (green), Lipoxigenase (Alox5) (yellow), and Phosphoinositide phospholipase C (red). Below the legend, a bar chart shows a value of 1 for Phosphoinositide phospholipase C. A slider at the bottom is set to 0, with a maximum value of 360.
